 <p>Automatically calculates and streamlines medical provisions</p>	 <p>Secure built-in invoicing and payments to make life easier</p>	 <p>Streamlined and efficient approval with audit trail of documentation and communication</p>	 <p>Access to the Openbrolly community where you can find information, training and peer support</p>
 <p>Includes enquiries</p>	 <p>Key reporting on event types, economic impact attendance and more</p>	 <p>Contact management system to help build strong relationships with event organisers</p>	 <p>Cost effective and great value</p>

EventsMakr

POWERED BY Openbrolly

Event Organisers looking to request permission to hold an event

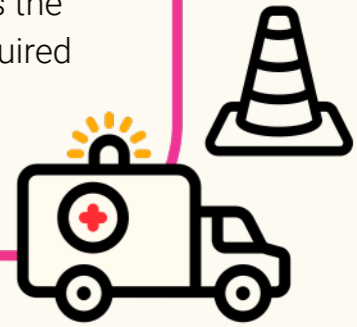

They use online permit system

Local Authority processes several applications simultaneously

EventsMakr disseminates information to the relevant sectors and calculates the medical provisions required

Local Authority sends out permits, invoices and reports

"EventsMakr has been developed involving local authority event officers and event safety practitioners whose quest was to find an event permit system that avoided the bureaucracy of existing systems. It not only provides a more customer focused solutions, but will streamline our processes & improve efficiency."

Andrew Wood - Emergency Planning Officer

Who we are and what we do

Openbrolly is a successful software services company, established in 2000 and based in the UK.

We provide software products and cloud solution services to the Film and TV production industries in the UK and internationally.

Eventsmakr was developed working with event offices to improve their business processes to save time and money, as well as improve economic impact.

Our mission is to work with event makers and event offices around the world to make events happen.

We design, build and provide cloud computing based services and solutions which comprises rented (licensed) software infrastructure, security and support. Simply this means:

- No infrastructure or IT knowledge is required by our clients to use our services beyond access to the internet with a PC or mobile device.
- Services are available globally, anywhere, anytime, by anyone (that you authorise)
