MovieSite Local

MovieSite
POWERED BY ⬤ Openbrolly

MovieSite's Local model enables you to unite your districts, to ensure you make production happen.

Our tiered **local** system allows national and country hubs to connect with smaller film offices/local authorities in their jurisdictions to provide a comprehensive service to manage locations and reporting.

The **MovieSite Local** model provides a standardised approach to locations across partners:

- Avoids double entry when sharing location information between offices
- Unite and unify film offices
- Provide a consistent, standardised approach across partners
- Improves the user experience
- Increases efficiency

MovieSite

Feature overview

- The **Local** model includes part of our **Production Tracking** functionality in **MovieSite** and sits within it.
- It delivers key functionality requirements and allows limited branding customisations for the film offices.
- None-core fields can be switched on and off in the application form according to individual film office needs.
- Low cost and effective delivery

Identity

Each office will receive:

- It's own application form that is multi-branded with the hub.
- A client portal and customised documentation linked to its own 'spoke' license for the **MovieSite** system.

Ability to produce reports

At a **regional and national** or **region and district**, reports can be generated without the need for double keying. This is done by creating a mirroring service between the spokes and the central film office/agency databases. The result: a streamlined process that delivers accurate data in real time.

Our MovieSite Local model is Covid-19 prepared

MovieSite FAQ's

POWERED BY Openbrolly

Does it save me time?

- It provides a clear, understood and consistent pathway for dealing with enquiries.
- It opens up the opportunity for a co-ordinating office to help out when staff are unavailable
- Any reports are standardised across the offices and information is automatically sent to the co-ordinated office if required.

Does it save me money?

- Yes it does. A single system is shared by all the offices. You get the functionality you need at a great price.

Does it provide support?

- Great support is provided through the **MovieSite Community** as well as account management through the co-ordinated office.
- We monitor our systems 24/7 and we often spot a problem before you do.
- Our up time is approx. **98.8%** a year.

Why use this model?

Local allows a coordinating office to work with smaller partners to create a professional and coordinated service.

Accessibility, equality and data protection

Openbrolly stores data in an audited, accredited data centre. Our hosting environment is compliant with ISO 27001 security management standard, ISO 9001 quality assurance, ISO 27018 personal data protection and the new ISO 27017 for cloud security.

It is also compliant with Directive 95/46/EC (Personal Data Processing) and the UK Data Protection Act.

POWERED BY Openbrolly

Who we are and what we do

Openbrolly is a successful software services company, established in 2000 and based in the UK.

We provide software products and cloud solution services to the Film and TV production industries in the UK and internationally.

MovieSite was developed working with film offices to improve their business processes to save time and money, as well as improve economic impact.

Our mission is to work with film makers and film offices around the world to make production happen.

We design, build and provide cloud computing based services and solutions which comprises rented (licensed) software infrastructure, security and support. Simply this means:

- No infrastructure or IT knowledge is required by our clients to use our services beyond access to the internet with a PC or mobile device.

- Services are available globally, anywhere, anytime, by anyone (that you authorise)
